

**Mastercool**<sup>®</sup>  
"World Class Quality"

**ELECTRONIC LEAK DETECTOR**

**TROUBLESHOOTING  
(55100)**

**Battery Check:** Always check the batteries before any kind of repair. Weak batteries can create false readings.

	<b>ISSUE</b>	<b>SOLUTION</b>
1.	No keypad reaction	Replace the keypad (55100-KEY)
2.	No leak readings	<ul style="list-style-type: none"><li>• The sensor may need to be replaced (55100-SEN) (Sensors usually last around 20 hours)</li><li>• The probe may need to be replaced (55100-PR)</li></ul>
3.	When the unit is not responding to any function	<ul style="list-style-type: none"><li>• Look for loose or broken wires on the PC board</li><li>• May need to change the PC board (55100-PC)</li></ul>
4.	LED lights do not show any readings	Replace the LED light (55100-LED)

**REPLACEMENT PARTS**

<b>DESCRIPTION</b>	<b>PART #</b>
SENSOR	55100-SEN
PROBE	55100-PR
PC BOARD	55100-PC
KEY PAD	55100-KEY
LED LIGHT	55100-LED
