CAUTION

- Always read instructions carefully before using the tool
- Always wear eye protection that meets OSHA and ANSI Z87.1 standards
- Always wear gloves when working with the tool

INSTRUCTIONS

1. Drain the coolant from the radiator.
2. Select a suitable sized rubber bushing and fit it to the lower part of the radiator adapter. Insert the adapter into the radiator or expansion tank filler neck. Turn the sealing collar to make a seal between the tools and the radiator or expansion tank filler neck.
3. Check the cooling system pressure of the vehicle.
4. Attach the heavy duty truck diagnostic smoke machine to the adapter.
5. Using the instructions from heavy duty truck diagnostic smoke machine, pressurize the cooling system with smoke. Use the flashlight to check for leaks.
